

**City of Quincy**  
**Field Guide of Trees**

**For Zones 1, 2, & 3 in the Vicinity of Downtown**

## Acknowledgements

**This City of Quincy Field Guide of Trees was created by the Quincy Department of Planning & Community Development.**

**By Susan C. Karim**

Boston Architectural College Landscape Architecture student

Under the direction & tutelage of **Mary A. Smith, RLA, Principal Planner Quincy Department of Planning**

With the invaluable assistance of **Kristina Johnson, Principal Planner** and **Steve Connelly, Assistant Planner**

And with the help of Quincy Planning Department staff members:

- **Liz Manning, Principal Planner**
- **Nancy Callanan, CDBG Director**
- **Rob Stevens, Sr. Planner**
- **Sean Glennon, Assistant Planner**
- **Bob Donald, Finance Manager**
- **Nick Verenis, Economic Planner**
- **Susan Callow, Support Staff**
- **Chris Chaudhary, Support Staff**

With additional thanks to the **Quincy Department of Parks and Forestry**

**DENNIS E. HARRINGTON**  
Planning Director

**THOMAS P. KOCH**  
Mayor

## Intention of Use

**This tree census is integral to sustainable planning, can be used to keep pace with development and to provide a spatial framework in which to identify areas that are in need of reforestation and maintenance. It can be used by the City to record updates and changes and by citizens to care for individual trees.**

- The Guide contains information recording the condition of 481 trees in the Downtown Quincy area, compiled between July & November 2009. The photographs capture the trees in various states of foliage dependent on the season.
  
- For ease of use the trees were grouped into sections of 20. Each section contains:
  - A Map of the location of the trees \*
  - A Condition Chart of the trees
  - Photographs of each tree
  - A Notes page to record updated information \*\*

\* Note: A few of the location maps were grouped into smaller sections of trees to compensate for too much distance or concentration of space between them..

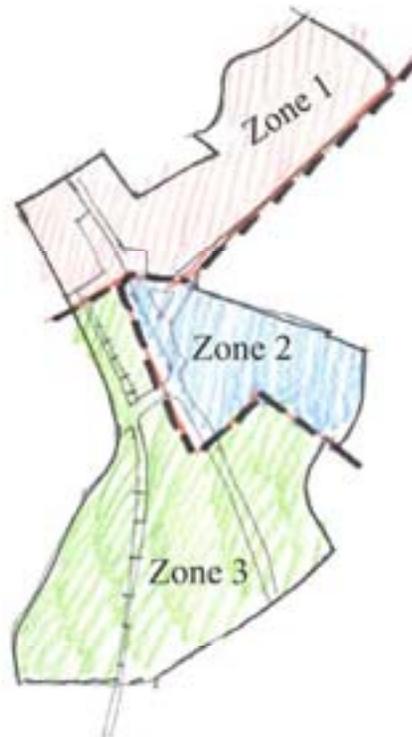

\*\* Notes pages were included to update any changes in information observed in the field regarding the condition of the trees with the intention that such observations will broaden the scope of our understanding of the natural landscape & result in increasing our ability to ensure that it thrives.

**The flora of our Landscape depends on our continued care, but the health of our trees affects us, too. Healthy trees mean cleaner air quality for us. Use this Guide wisely & ENJOY!**

# City of Quincy Field Guide of Trees

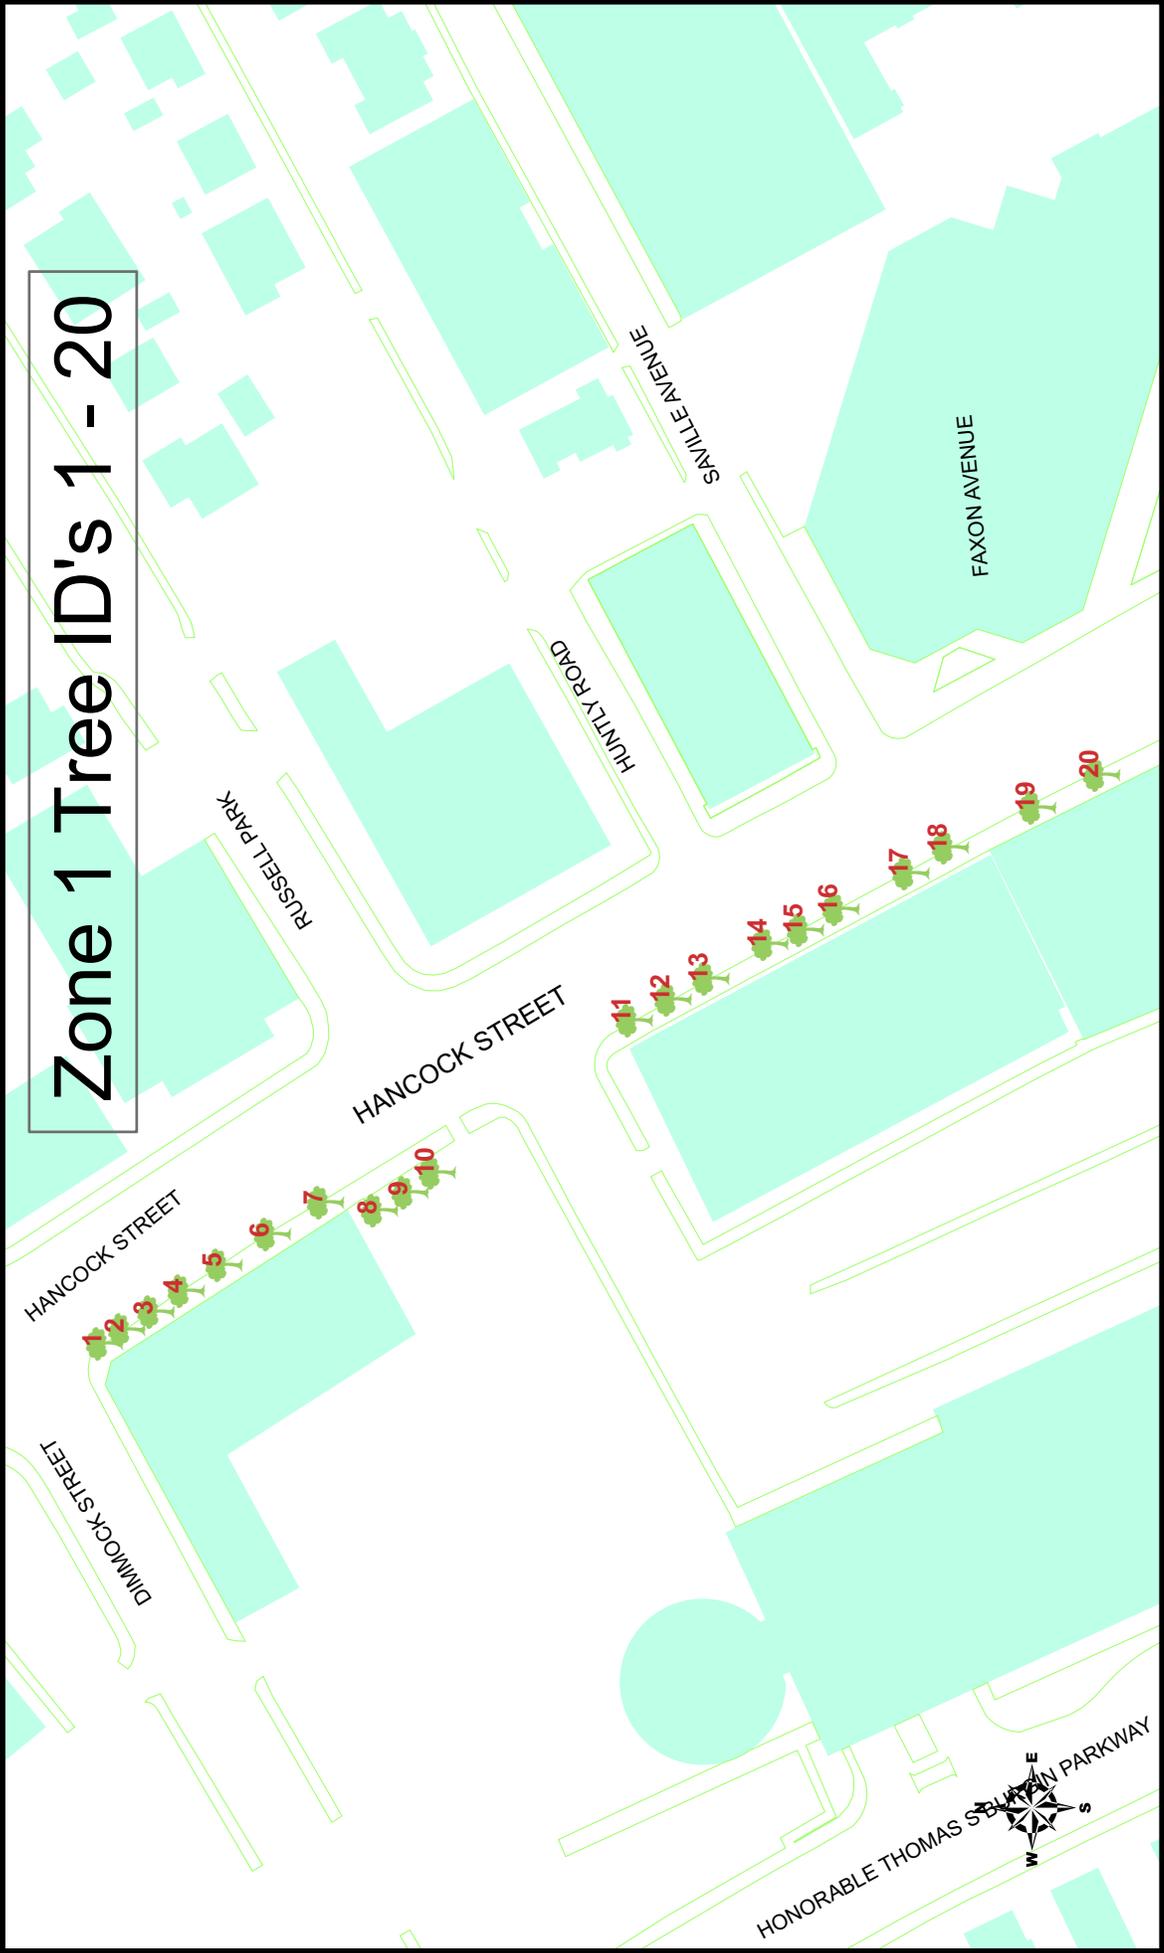

November 16, 2009

- Maps of Zones 1, 2, & 3 with locations of 481 trees within the boundaries of the Quincy Center Zoning Districts
- Charts of conditions & recommendations for care of trees
- Photographs of trees in their current condition
- Notes pages for recording updated information

Quincy Center Zoning Districts -  
Orientation Map

# Zone 1 Tree ID's 1 - 20

	sidewalk
	buildings

ID#	Street	Species	Health	Growing Conditions	Recommended Pruning	Caliper/ height	Mechanical Damage	Decay/Disease	Foliar Condition
1	hancock st.	callery pear	good	flat/ room to grow	a bit leggy...could use pruning of dead & overhanging branches and some thinning	6-7"/ 12'	gash & scar from trucks & snowblowers...low branches snapped by trucks, but overall healthy	minor insect damage/ low dead branches	a bit wilted
2	hancock st.	callery pear	poor- good	flat/ room to grow	prune lower branches and suckers	3"/ 12'	gash from snowblower at the bottom of trunk	minor insect damage/ low dead branches	sparse foliage
3	hancock st.	callery pear	good	flat/ room to grow/ little weedy - roses and grass	prune lower branches dead from truck damage	7"/ 12'	gash from snowblower	minor insect damage/ low dead branches	slightly wilted foliage
4	hancock st.	callery pear	great	flat/ room to grow	could use slight pruning to thin and shape	8"/ 12'	minor trunk damage...branch cuts healing nicely	minor insect damage/ few low dead branches	very healthy foliage
5	hancock st.	callery pear	poor	sunken/ little weedy	prune dead and leggy branches	5"/ 12'	very bad trunk damage from snow blower	sparse and leggy branches with minor foliar insect damage	very wilted/ dry tips, brown leaves...needs a good watering
6	hancock st.	callery pear	good	flat/ room to grow	broken	3"/ 12'	base of trunk misshapen...scar & gash in bark	minor insect damage	thick and healthy leaves
7	hancock st.	callery pear	great	slight lift	could use slight pruning	10"/ 15'	no damage to trunk...quite healthy	minor insect damage	thick and healthy leaves
8	hancock st.	kwanzan cherry ( on private property)	great	no grate	branches overhanging sidewalk need to be pruned frequently	10"/ 15'	large healthy trunk...well cared for	none detected	thick and healthy leaves
9	hancock st.	kwanzan cherry ( on private property)	great	no grate	branches overhanging sidewalk need to be pruned frequently	10"/ 15'	large healthy trunk...well cared for	none detected	thick and healthy leaves
10	hancock st.	kwanzan cherry ( on private property)	great	no grate	branches overhanging sidewalk need to be pruned frequently	10"/ 15'	large healthy trunk...well cared for	none detected	thick and healthy leaves
11	hancock st.	callery pear	good	flat/ room to grow	prune short dead low branch stumps, leggy, & overhanging branches	6"/ 12'	2 gashes from truck damage	several low twigs snapped by trucks/ broken branches	mild wilting & insect damage
12	hancock st.	callery pear	poor to good	slightly tilted - flat on one side, sunken on the other/ room to grow	prune low overhanging branches & dead branch tips	6-7"/ 15'	healthy trunk/ one small crack in bark	several low twigs snapped by trucks/ decay at twig tips	slight wilting, yellowing & browning of leaves/ sparse upper canopy/ existing leaves healthy
13	hancock st.	callery pear	poor	extremely sunken and tilted/ room to grow	prune low overhanging branches & dead branch tips	5-6"/ 12'	small gash in bark	several low twigs snapped by trucks/ severe decay at branches	slight wilting, yellowing & browning of leaves/ severely sparse upper canopy
14	hancock st.	callery pear	poor to good	tilted - sunken on one side, lifted on the other/ sucker at base of trunk/ exposed, sharply pruned trunk base	prune low overhanging branches, dead branches, & small leggy shoots	5-6"/ 12'	one branch scar on trunk healing nicely/ overall healthy trunk	a few dead branches & twigs/ sparse branching habit	some wilting/ a few dead leaves/ significant foliar insect damage
15	hancock st.	callery pear	poor to good	slight sunken tilt/ room to grow	prune dead twigs, low & overhanging branches...could use some thinning	4-5"/ 12'	gash on street side/ 1 or 2 minor cracks in bark	a few dead branches & twigs/ some snapped by trucks	seems very dry & wilting/ sparse foliage in places/ fairly significant insect damage
16	hancock st.	callery pear	good	slight lift/ suckers at trunk base/ room to grow	prune low, dead, overhanging branches on street side & branch tips...could use thinning of new shoots	4"/ 12'	some fairly significant gashes in bark, but healing	low broken branches on sidewalk side/ several low branches snapped by trucks/ a few dead twigs	some wilting/ a few dead leaves/ some yellowing/ slight insect damage
17	hancock st.	callery pear	poor	broken grate/ mostly flat/ room to grow	prune low & dead branches	10"/ 15'	deep crevices and significant exfoliation to the bark exposing wood/ large scars on trunk	broken branches on street side from trucks/ completely stripped branch tips - looks to be dying	significant leaf loss on dying branches though remaining leaves appear quite healthy/ some minor insect damage
18	hancock st.	callery pear	good	flat/ very weedy/ room to grow	prune low & dead branches	5-6"/ 12'	several pruned low branches/ significant scars and bark exfoliation/ very large wound on lower branch exposing wood	low broken branches	leaf loss, especially at branch tips/ some insect damage
19	hancock st.	callery pear	poor- good	sunken on one side - flat on the other/ room to grow	prune low & overhanging branches	10" / 12'	misshapen trunk/ significant pruning of low branches/ scars, crevices & exfoliation of the bark	low broken branches & dead twigs	leaf loss, especially at upper branch tips/ significant insect damage
20	hancock st.	callery pear	poor	sunken on street side/ very weedy/ room to grow	prune overhanging & dead branches	8-10"/ 15'	severely exfoliated bark & several scars/ several pruned low branches	significant dead branches and twigs	significant leaf loss on dying branches, especially upper tips/ some wilting of foliage/ significant insect damage

# Zone 1 Tree ID's 21-40

Map created by the Quincy Planning and  
Community Development Department

- sidewalk
- buildings

ID#	Street	Species	Health	Growing Conditions	Recommended Pruning	Caliper/ height	Mechanical Damage	Decay/Disease	Foliar Condition
21	hancock st.	callery pear	poor- good	severely sunken in one corner/ weedy/ room to grow	prune low & overhanging branches	10-12"/ 15'	significant exfoliation of bark at base of trunk/ many cracks, crevices, & large scars/ many low pruned branches	dying branches, especially at tips	leaf loss though remaining leaves in good condition/ very minor insect damage
22	hancock st.	callery pear	good	slightly lifted/ slightly weedy	prune overhanging & leggy branches	10"/ 15'	several pruned low branches/ healthy lower trunk/ broken branches broken by trucks, but all wounds healing nicely	decay on branches	slight wilting of foliage/ significant insect damage
23	hancock st.	callery pear	poor - good	sunken one side - tilted/ slight room to grow/ slightly weedy	sparse, leggy habit that needs pruning	10"/ 15'	damage on street side/ pruned & broken low branches on both street & sidewalk sides	bare, decaying branches	minor insect damage
24	hancock st.	callery pear	good	severely sunken on street side - lifted on other/ extremely weedy/ room to grow	prune very low overhanging branches	3-4"/ 12'	trunk appears very healthy with slight damage to bark	branches all healthy	very very minor wilting of foliage in places/ minor insect damage
25	hancock st.	callery pear	great	broken grate/ lifted/ room to grow	prune low & thin out new shoots/ prune dead tips	3"/ 15'	few low branches pruned and snapped/ crack in trunk	1 low dead branch/ some foliar insect damage	very healthy foliage
26	hancock st.	sycamore	good	very lifted/ room to grow	prune few dead branch tips & low overhang	10-12"/ 30'	prune low branch scars...gorgeous trunk	dead branch tips/ few dead branches/ minor foliar insect damage	several dead leaves/ remaining foliage healthy
27	hancock st.	sycamore	poor	broken grate/ lifted/ room to grow	significant dead branches & twigs	10-12"/ 25'	several trunk scars & gashes/ low pruned branch scars	significant dead branches and twigs/ minor foliar insect damage	few dying leaves, but significant leaf loss
28	hancock st.	callery pear	poor	broken grate/ mostly flat/ room to grow/ tunk collar	low/ dead/ crowded...thin middle shoots	2-3"/ 12'	few low twigs snapped/ few cracks in bark	several dead branches/ significant foliar damage from insects & disease/ brown spots on leaves	dead & dying leaves
29	hancock st.	callery pear	poor	slightly sunken/ trunk collar/ room to grow	low/ dead	2-3"/ 12'	low gash in trunk/ few pruned & snapped low twigs	several dead branches & twig ends/ significant foliar insect damage	some wilt, dead, & dying leaves/ some browning on leaf margins
30	hancock st.	sycamore	extremely poor	broken grate/ slightly lifted/ weedy/ room to grow	dead	12"/ 25'	few snapped & pruned low branches	significant dead branches	severe leaf loss
31	hancock st.	sycamore	good	broken grate/ tilted - lifted & sunken/ room to grow	dead/ overhang	12"/ 30'	few gashes in trunk/ some low pruned branch scars healing nicely	dead branch tips/ minor foliar insect damage	few dead leaves
32	hancock st.	callery pear	good	broken grate/ tilted - flat to sunken/ room to grow	overhang	10"/ 25'	low pruned branch scars & snapped branches	dead branch/ foliar damage from insects & disease/ brown spots on leaves	dead & dying leaves/ browning/ some wilting
33	hancock st.	callery pear	good	flat/ room to grow'	low/ overhang/ thin small shoots	3"/ 12'	deep crevices healing nicely/ low snapped branches	minor foliar damage from insects/ also browning of leaves from disease or overwatering?	dead & dying/ some wilting & browning
34	hancock st.	callery pear	poor	tilted - sunken & lifted/ weedy/ room to grow	dead/ low/ broken	3"/ 12'	several cracks & scars/ some exfoliation of bark/ few low pruned branch scars	significant dead branches, branch tips, & leaves from insects & disease	wilty/ some browning
35	hancock st.	callery pear	great/ very healthy	slightly sunken/ room to grow	low/ overhang/ broken	4"/ 15'	few gashes in trunk/ low broken branches	minor foliar insect damage	some browning of leaf margins
36	hancock st.	callery pear	great	slightly sunken/ slightly weedy/ room to grow	low/ dead/ snapped/ could use some thinning of twigs	4-5"/ 15'	deep cavity & small gash in trunk/ several wounds on lower branches exposing wood	possible insect eggs found on 1 low branch (tiny red dots) / minor foliar insect damage	some minor browning of leaves
37	hancock st.	callery pear	good- great	no grate/ mulch	low/ overhang/ dead tips/ could use some thinning of twigs/ leggy habit	7-8"/ 10'	some low snapped branches/ minor exfoliation of bark	very minor foliar insect damage	very minor yellowing & browning
38	hancock st.	callery pear	great	no grate/ mulch	low/ overhang & dead twigs	8-9"/ 10'	some low snapped & pruned branches	minor foliar insect damage	some minor yellowing & browning of leaves
39	hancock st.	callery pear	great	no grate/ grass/ some exposed roots	low/ overhang	15"/ 10'	some low pruned branches	very minor foliar insect damage	few dead yellowed & browned leaves
40	hancock st.	callery pear	poor	no grate/ grass	low/ overhang/ leggy habit	10"/ 8'	low pruned branch scars & suckers at trunk base	several dead branches/ remaining leaves healthy w/ some minor insect damage	very minor yellowing & browning

Map created by the Quincy Planning and Community Development Department

ID#	Street	Species	Health	Growing Conditions	Recommended Pruning	Caliper/ height	Mechanical Damage	Decay/Disease	Foliar Condition
41	hancock st.	callery pear	good	no grate/ grass/ minor exposed roots	low/ overhang/ leggy habit	10-12"/ 10'	low pruned branch scars	few dead branches/ very minor foliar insect damage	very minor yellowing & browning
42	washington st.	callery pear	great	flat/ weedy/ room to grow	low/ overhang	10" / 15'	few broken branches & scars/ slight exfoliation of bark	very minor foliar insect damage	very minor yellowing & browning
43	washington st.	callery pear	good	flat/ weedy/ room to grow	thin a few branches, prune dead branches & branch tips	10"/ 15'	very large cavity in trunk/ small cavity from broken branch low on trunk/ cavity on lower branch/ tree marked w/ black band	dead branches & tips/ very minor foliar insect damage	very minor browning of leaf margins
44	washington st.	callery pear	good	flat/ weedy/ room to grow	dead branches & tips	10"/ 15'	pruned branch scars healing nicely	dead branches & tips/ very minor foliar insect damage	very minor browning of leaf margins
45	washington st.	callery pear	good	flat/ slightly weedy/ room to grow	dead branches & tips/ lower branches	8"/ 12'	scars on low branches exposing wood/ broken lower branches/ small deep cavity/ large gash in trunk on the sidewalk side	dead branches & tips/ very minor foliar insect damage	very minor yellowing & browning
46	washington st.	callery pear	good	flat/ slightly weedy/ room to grow	low & broken branches	8"/ 12'	small gash & crack in bark/ large cavity base of trunk exposing wood	very minor foliar insect damage	very minor yellowing & browning
47	coddington st.	callery pear	poor	no grate/ mulch/ room to grow	dead branches & tips	3"/ 12'	slightly misshapen the base of trunk/ minor small branch pruning scars	dead branches & tips/ foliar insect damage & disease - brown spots on leaves	significant leaf loss
48	coddington st.	callery pear	poor- good	no grate/ mulch/ room to grow	dead tips	3"/ 15'	tiny pruning scars healing nicely	dead branch tips/ foliar insect damage	none
49	coddington st.	callery pear	great	no grate/ mulch/ room to grow/ little weedy	no pruning necessary	3"/ 15'	tiny pruning scars healing nicely	minor foliar insect damage	none
50	coddington st.	callery pear	poor- good	no grate/ mulch/ room to grow	dead branches & tips	3"/ 15'	misshapen trunk @ base/ tiny prune scars healing nicely/ few small gashes in bark	dead branches & tips/ minor foliar insect damage	significant leaf loss
51	coddington st.	callery pear	poor- good	no grate/ mulch/ room to grow	dead branches & tips	3"/ 15'	misshapen trunk base/ few minor pruning scars	dead branches & tips/ very minor foliar insect damage	fairly significant leaf loss
52	coddington st.	sycamore	poor	no grate/ mulch/ room to grow/ slightly weedy	dead branches & tips	3"/ 12'	no damage to trunk	dead branches & tips/ significant lacing on leaves	significant leaf loss/ minor yellowing & browning of leaves/ minor wilting/ some dead
53	coddington st.	pin oak	great	no grate/ mulch/ room to grow/ minor exposure of roots	low & dead branches & tips	12"/ 40'	several good size scars healing nicely/ few small gashes in bark/ several low broken branches & pruned branches	some dead branches & tips/ minor foliar insect damage	lush canopy w/ small handful of dead leaves
54	coddington st.	green ash	great	no grate/ mulch / room to grow/ some exposure of roots	crowded & dead branches	15"/ 40'	some scarring on trunk, but healing nicely/ few broken branch stumps & scars	few dead branches/ very minor foliar insect damage	lush canopy w/ small handful of dead leaves
55	coddington st.	sycamore	poor- good	no grate/ soil/ weedy	low, overhanging, dead, & leggy branches/ trim twigs & dead tips	12"/ 35'	none	some dead branches/ significant lacing on leaves	some dead & wilting
56	coddington st.	sycamore	good - great	no grate/ mulch/ room to grow	few dead tips/ trim to shape lopsided, leggy habit	6"/ 15'	few pruning scars healed nicely	few dead tips/ some lacing on leaves	a small handful of dead leaves
57	coddington st.	sycamore	great	no grate/ mulch/ room to grow/ weedy	few dead tips/ little leggy habit	7"/ 15'	few pruning scars healed nicely	few dead tips/ some lacing on leaves	few dead leaves/ some wilting
58	coddington st.	sycamore	great	no grate/ mulch/ room to grow/ slightly weedy	few dead tips	7"/ 15'	few pruning scars healed nicely	few dead tips/ some lacing on leaves	few dead leaves/ some wilting
59	coddington st.	sycamore	great	no grate/ mulch/ room to grow/ little weedy	trim dead twigs crowding inside of canopy	7-8"/ 15'	minor graffit scars on bark/ few pruning scars healing nicely	few dead twigs & tips/ lacing on leaves	several dead & wilting leaves
60	coddington st.	sycamore	great	no grate/ mulch/ room to grow/ exposed roots/ weedy	dead twigs & tips	8"/ 15'	few very minor scrapes in bark	few dead twigs & tips/ lacing on leaves	several dead & wilting leaves

Map created by the Quincy Planning and  
 Community Development Department

ID#	Street	Species	Health	Growing Conditions	Recommended Pruning	Caliper/ height	Mechanical Damage	Decay/Disease	Foliar Condition
61	coddington st.	sycamore	good	no grate/ mulch/ room to grow/ exposed roots/ weedy	dead twigs & tips	6-7"/ 15'	few pruning scars healed nicely/ few very minor scrapes in bark	few dead twigs & tips/ lacing on leaves/ sparse branching habit	several dead & wilting leaves
62	coddington st.	sycamore	good	no grate/ mulch/ room to grow	dead branches	5-6"/ 15"	minor scrapes/ some cracks w/ brown blotches/ few pruning scars healing nicely/ 1 rather large scar	several dead branches/ little lacing on leaves/ sparse branching habit	few dead & wilting leaves
63	coddington st.	sycamore	poor- good	no grate/ mulch/ room to grow/ little weedy	dead, leggy, & overhanging branches	5-6"/ 15'	minor decay @ pruning scar	several dead branches & tips/ lacing on leaves/ sparse, leggy habit	few dead & wilting leaves
64	coddington st.	sycamore	poor - good	no grate/ mulch/ room to grow/ little weedy	dead branches & tips	5"/ 17'	few cracks & pruning scars healing nicely	several dead branches & tips/ lacing on leaves/ dense habit	few dead & wilting leaves
65	coddington st.	crabapple	good	slightly mounded mulch/ room to grow	dead branches & tips/ suckers/ low & overhanging branches	30"/ 20'	pruning scars healing nicely/ several sunken knots/ low, rotting broken branch	several dead branch tips on one side w/ loss of leaves	some browning & yellowing of leaves
66	coddington st.	norway maple	great	mounded mulch/ very slightly weedy/ room to grow	few dead twigs	30"/ 20'	few pruning scars healing nicely/ few minor cracks in bark/ tiny knot on trunk	some foliar insect damage	some wilting of leaves
67	coddington st.	norway maple	great	mounded mulch/ very slightly weedy/ room to grow	few dead twigs/ brown decay in & around scar	40"/ 20'	few pruning scars healing nicely/ few minor cracks in bark/ 1 knot w/ some brown rot	some foliar insect damage	some wilting of leaves
68	spear st. - inside grounds of thomas crane public library	honey locust	great	no grate/ surrounded by grass/ misshapen base of trunk/ room to grow	few dead branches/ weeds growing from trunk	60-70"/ 50'	crevice @ base of trunk/ some cracking of bark	few large dead branches & branch tips/ 1 rotting, broken branch	none
69	spear st. - inside grounds of thomas crane public library	green hawthorn	good	no grate/ mulch/ slightly weedy/ room to grow	few dead twigs	6"/ 12'	tree collar never removed & is severely cutting into & embedded in the trunk	very minor foliar insect damage	minor wilting & a few dead leaves
70	spear st. - inside grounds of thomas crane public library	london plane tree? No samaras	great	mounded mulch/ very slightly weedy/ room to grow	low & broken branches	5"/ 15'	few minor cracks & scars in bark/ broken lower branches	some foliar insect damage	slightly wilting leaves
71	spear st. - inside grounds of thomas crane public library	london plane tree? No samaras	great	mounded mulch/ slightly weedy/ room to grow	few dead twigs	5-6"/ 15'	few minor cracks & scars in bark/ broken lower branches	some foliar insect damage	few dead & wilting leaves
72	spear st. - inside grounds of thomas crane public library	littleleaf linden	great	encroaching grass/ room to grow/ slight exposure of roots	dead branches & twigs/ a good many snapped twigs on the ground beneath the tree need to be cleared away	70"/ 30'	cracks in bark w/ slight wood exposure on one tiny section of trunk	several dead branches/ some foliar insect damage	some dead & yellowing leaves
73	spear st. - inside grounds of thomas crane public library	littleleaf linden	great	minor encroaching grass/ exposed roots/ room to grow	few dead, low, & overhanging branches	70"/ 40'	pruning scars of lower branches healed nicely	few dead branches & twigs	few dead/ minor wilting
74	coddington st. - inside grounds of thomas crane public library	european beech	great	minor encroaching grass/ exposed roots/ room to grow	dead & broken branches & twigs/ a good many snapped twigs on ground beneath the tree need to be cleared away	100+"/ 50'	some deep cracks in trunk/ graffiti & pruning scars healing nicely	several dead & broken branches & twigs/ some brown spotting on leaves/ minor foliar insect damage	some wilting & dying of leaves
74	coddington st. - inside grounds of thomas crane public library	honey locust	good- great	encroaching grass/ room to grow	dead, low, & overhanging branches	70"/ 40'	mild misshapen trunk @ base	several dead branches/ mild foliar insect damage	few wilting leaves
76	coddington st. - inside grounds of thomas crane public library	littleleaf linden	good- great	encroaching grass/ room to grow	low, broken branches	5"/ 12'	several cracks / one large gash @ base of trunk exposing wood/ some minor graffiti & pruning scars healing nicely	a few snapped lower branches/ some foliar insect damage, especially @ branch tips	none
77	washington st. - inside grounds of thomas crane public library	honey locust	great	encroaching grass/ room to grow/ very minor root exposure	dead, low, & overhanging branches	70"/ 30'	very minor cracking in bark/ pruning scars healing nicely	dead branches & twigs/ some minor foliar insect damage	none
78	washington st. - inside grounds of thomas crane public library	littleleaf linden	great	encroaching grass/ very misshapen @ base of trunk/ room to grow	dead branches	80"/ 30'	some cracks & crevices in trunk/ few spots of broken bark/ pruning scars healing nicely	dead branches, twigs, & tips/ some foliar insect damage	some wilting, yellowing, & dead leaves
79	washington st. - inside grounds of thomas crane public library	littleleaf linden	great	encroaching grass/ room to grow	dead & overhanging branches	100+"/ 30'	pruning scars healing nicely	several dead branches, twigs, & tips/ some foliar insect damage	significant wilting & minor yellowing of leaves
80	washington st. - inside grounds of thomas crane public library	flowering dogwood	good- great	mulch/ room to grow	dead & overhanging branches	multi-stem 20-30"/ 15'	pruning scars healing/ 1 pruning scar rotting & exposing wood	several dead branches, twigs, & tips/ some foliar insect damage	some wilting, yellowing, browning, & dead leaves

City of Quincy, Massachusetts

Mayor Thomas P. Black

	sidewalk
	buildings

ID#	Street	Species	Health	Growing Conditions	Recommended Pruning	Caliper/ height	Mechanical Damage	Decay/Disease	Foliar Condition
81	washington st. - inside grounds of thomas crane public library	flowering dogwood	great	encroaching grass/ little weedy/ minor root exposure/ room to grow	dead branches and suckers @ base of trunk	multi-stem 30- 40"/ 15'	pruning scars, broken branches w/ some wood exposure/ few significantly deep cavities in one branch: looks like a borer or gnawing of some type	dead branches, twigs, & tips/ some foliar insect damage	some wilting, yellowing, browning, & dead leaves
82	corner of coddington & washington sts. - inside the grounds of thomas crane public library	? - an older tree w// corky bark	extremely poor - tree is dying	encroaching grass/ mild root exposure	significant dead branches & twigs	100+*/ 50'	few deep crevices/ some exfoliation of bark	significant loss of branches	significant loss of leaves
83	corner of coddington & washington sts. - inside the grounds of thomas crane public library	unknown	great	mulch/ room to grow	dead & low branches	multi-stem 3-4"/ 20'	pruning scars and snapped branches	few dead & decaying branches/ minor foliar insect damage	minor wilting & yellowing/ a few dead leaves
84	corner of coddington & washington sts. - inside the grounds of thomas crane public library	unknown	great	mulch/ room to grow	suckers, dead & low branches	multi-stem 7-8"/ 15'	some broken branches, cracks, graffiti scratches, scars, & cavities in trunk/ pruning scars healing nicely	foliar insect damage	some wilting, dying, & dead leaves
85	corner of coddington & washington sts. - inside the grounds of thomas crane public library	? - new shoot - newer bark has lenticels	great	mulch/ room to grow	no pruning necessary except for possible removal of planting	1"/ 2'	none	none	none
86	corner of coddington & washington sts. - inside the grounds of thomas crane public library	? - leaf shape similar to hawthorn (branches w/o spikes) or more likely hedge maple ( no samaras detected)	great	mulch/ room to grow	no pruning necessary except for possible removal of planting	1"/ 2'	none	none	none
87	corner of coddington & washington sts. - inside the grounds of thomas crane public library	pin oak	good	mulch/ very crowded in a tight clump of trees...tree planting appears unplanned	no pruning necessary except for possible removal of planting which is recommended	3"/ 8'	none	none	none
88	washington st. - inside grounds of thomas crane public library	american elm	great	mulch/ room to grow	dead branches & tips, low & overhanging branches/ could use some thinning out	10"/ 15'	some lower branches snapped	few dead branches & tips/ foliar insect damage	brown spots, few yellow & wilting leaves
89	washington st. - inside grounds of thomas crane public library	american elm	great	mulch/ room to grow	could use some thinning out of canopy	8"/ 15'	some minor exfoliation of bark	few dead branches & tips/ fairly significant foliar insect damage	few dead leaves/ some minor wilting
90	washington st. - inside grounds of thomas crane public library	american elm	great	mulch/ room to grow	dead twigs, low, leggy, & overhanging branches	8"/ 15'	pruning scars healing nicely	few broken twigs & tips/ foliar insect damage	few dead leaves/ some yellowing/ brown spots
91	washington st. - inside grounds of thomas crane public library	american elm	great	mulch/ exposed soil - very dry/ slight exposure of roots/ slightly weedy/ room to grow	dead branches & twigs/ could use some thinning out	8"/ 15'	minor exfoliation of bark	dead twigs & tips/ foliar insect damage	some browning/ few dead
92	washington st. - inside grounds of thomas crane public library	honey locust	great	eroding slope causing some exposure of roots/ slightly weedy/ room to grow, but possibly unstable growing conditions	leggy & overhanging branches	10"/ 10'	some cracking of bark/ new pruning scars on lower branches	very minor foliar insect damage @ tips	none
93	washington st. - inside grounds of thomas crane public library	honey locust	great	slope/ surrounded by grass/ room to grow	leggy & overhanging branches/ dead branches & twigs	9"/ 9'	some cracking of bark	very slight foliar insect damage @ tips	none

ID#	Street	Species	Health	Growing Conditions	Recommended Pruning	Caliper/ height	Mechanical Damage	Decay/Disease	Foliar Condition
94	washington st. - inside grounds of thomas crane public library	honey locust	great	surrounded by grass/ slightly weedy/ room to grow	low & overhanging branches	10"/ 12'	cracking of bark/ old pruning scars healing nicely/ new pruning scars/ few snapped branches	1 or 2 dead branches/ foliar insect damage	minor yellowing
95	washington st. - inside grounds of thomas crane public library	black tupelo?	good	surrounded by grass/ weedy/ room to grow	dead branches	multi- stem 1" - 2"/ 7'	broken dead branches/ few deep crevices in bark exposing wood	several dead branches, twigs, & tips	1 or 2 yellow leaves
96	washington st. - inside grounds of thomas crane public library	black tupelo?	poor	surrounded by grass/ weedy/ room to grow	many dead branches	multi- stem 1" - 2"/ 6', but top branch dead	broken dead branches/ trunk scars	many broken, dead, & dying branches/ some foliar insect damage	some yellowing
97	washington st. - inside grounds of thomas crane public library	black tupelo?	good	surrounded by grass/ room to grow	dead & overhanging branches	multi- stem 1" - 2"/ 7'	several low broken branches/ several large cracks in bark, exposing wood	small blackened section of trunk branch - fire blight?/ several dead twigs & tips/ minor foliar insect damage	none
98	washington st. - inside grounds of thomas crane public library	black tupelo?	good- great	surrounded by grass/ slightly weedy/ room to grow	dead & overhanging branches	multi- stem 1" - 2"/ 7'	several low broken branches/ several large cracks in bark, exposing wood	several dead twigs & tips/ minor foliar insect damage	few dead, wilting, & yellowing leaves
99	washington st. - inside grounds of thomas crane public library	black tupelo?	great	surrounded by grass/ slightly weedy/ room to grow	dead & overhanging branches/ prune low suckers	multi- stem 1" - 2"/ 7'	several low broken branches/ several large cracks in bark, exposing wood	several dead branches/ minor foliar insect damage	few yellow leaves
100	washington st. - inside the quincy court parking lot	norway maple	good	encroaching grass/ slightly weedy/ room to grow	dead & leggy branches	20"/ 15'	none	dead & broken branches, twigs, & tips/ foliar insect damage	none

# Zone 2 Tree ID's 261-280

City of Quincy, Massachusetts

Map created by the Quincy Planning and  
Community Development Department

ID#	Street	Species	Health	Growing Conditions	Recommended Pruning	Caliper/ height	Mechanical Damage	Decay/Disease	Foliar Condition
261	burgin parkway	magnolia	great	mulch/ slightly sloped/ suckers/ slightly weedy/ room to grow	suckers	3"/ 10'	few knots exposing wood/ pruning scars healing	none	slight browning of leaf margins
262	burgin parkway	pine - 2 needles in fascicle	poor - good	mulch/ slightly sloped/ slightly weedy/ room to grow	dead	4"/ 12'	crevice @ base of trunk/ broken branches/ pruning scars healing	significant dead branches	brown needles & significant loss of needles
263	burgin parkway	catalpa	poor	mulch	dead - tree should be removed	9"/ 25'	significant rotting of trunk/ possible fire blight - blackening of bark/ broken branches/ tree appears to be dying	significant dead branches/ blackening of leaves	significant dead, dying, & wilting of leaves - quite a good many leaves blackened & shriveling/ no bean pods visible
264	burgin parkway	crab apple	poor- good	mulch/ slightly weedy/ room to grow	dead, low, & overhanging	multi-stem 10"/ 20'	broken branches/ few knots exposing wood/ pruning scars healing	several dead branches & twigs/ minor foliar insect damage	dead, wilting, browning, & yellowing leaves
265	burgin parkway	apple	poor	mulch/ weedy/ suckers/ room to grow	dead, low, & overhanging	multi-stem 10"/ 25'	pruning scars healing/ broken branch scars/ few cracks in bark	foliar insect damage/ tree has 2 trunks & one whole trunk is dying & should be removed	some brown spotting on leaves/ a few brown leaves
266	burgin parkway	crab apple	poor - good	mulch/ slightly weedy/ room to grow	dead	10"/ 20'	pruning scars healing/ a few knots	broken branches/ foliar insect damage	some wilting, browning, & yellowing of leaves
267	burgin parkway	crab apple	poor	mulch/ slightly weedy/ room to grow	dead	multi-stem 5"/ 15'	trunk is rotting/ knots & broken branches	dead branches/ foliar insect damage	wilting, browning, & yellowing leaves
268	burgin parkway	crab apple	poor - good	mulch/ slightly weedy/ room to grow	dead, low, & overhanging	multi-stem 8"/ 20'	knots with minor wood exposure/ broken branches	several dead branches/ foliar insect damage	wilting, browning, & yellowing leaves
269	burgin parkway	honeylocust	good	mulch/ room to grow	dead, low, & overhanging	15"/ 25'	pruning scars healing/ broken branches	significant dead branches	wilting, especially @ tips
270	burgin parkway	crab apple	good	mulch/ room to grow	dead & crowded branches	multi-stem 4"/ 15'	pruning scars healing/ gash in bark exposing wood/ knots/ broken branches	several dead branches & twigs	wilting, browning, & yellowing leaves/ some brown spots on leaves
271	burgin parkway	honeylocust	good	mulch/ minor root exposure/ room to grow	dead & crowded branches	10"/ 25'	broken branches	several dead branches & twigs	wilting @ tips
272	burgin parkway	catalpa	great	mulch/ room to grow	dead	10"/ 30'	pruning scars healing/ broken branches/ some blackening of bark - possible fire blight	several dead branches & twigs/ blackening of leaves	wilting, dead, & dying leaves
273	whitney rd.	littleleaf linden	great	no grate/ dry soil/ encroaching grass/ not much room to grow	dead, low, & overhanging branches	100"/ 30'	large knot in trunk exposing wood/ some exfoliation of bark	few dead branches, twigs, & tips/ minor foliar insect damage	few yellow & dead leaves
274	russell park	norway maple	poor	no grate/ dry soil/ weedy/ not much room to grow	dead branches	10"/ 15'	broken branches/ knots/ some exfoliation of bark/ large cavity near base / trunk rotting from the inside	whole top of tree is dead/ many dead branches/ minor foliar insect damage/ tree is competing with a larger littleleaf linden	some brown spots & margins/ some dead leaves/ significant leaf loss
275	huntly rd.	american arborvitae	good	dry soil/ slightly weedy/ room to grow	dead & overhanging branches	multi-stem 5"/ 20'	none	few dead branches	some brown needles
276	huntly rd.	american arborvitae	good	dry soil/ little weedy/ room to grow	dead branches & weeds	multi-stem 3"-5"/ 20'	none	few dead branches/ back side of tree has sparse foliage due to crowded & sunless conditions	few brown needles
277	huntly rd.	american arborvitae	good	dry soil/ a little crowded, but room to grow	dead & overhanging branches	multi-stem 1" 3"/ 20'	none	few dead branches/ back side of tree has sparse foliage due to crowded & sunless conditions	few brown needles
278	huntly rd.	american arborvitae	good	dry soil/ crowded/ a little weedy	dead, overhanging, & leggy branches/ weeds	multi-stem 1" 3"/ 20'	none	few dead branches/ back side of tree has sparse foliage due to crowded & sunless conditions	few brown needles
279	huntly rd.	american arborvitae	good	dry soil/ crowded/ a little weedy	dead, overhanging, & leggy branches/ weeds	multi-stem 1" 3"/ 20'	none	few dead branches/ back side of tree has sparse foliage due to crowded & sunless conditions	few brown needles
280	huntly rd.	american arborvitae	poor- good	dry soil/ crowded/ weedy	dead, overhanging, & leggy branches/ weeds	3"/ 15'	few broken branches	few dead branches	few brown needles

ID#	Street	Species	Health	Growing Conditions	Recommended Pruning	Caliper/ height	Mechanical Damage	Decay/Disease	Foliar Condition
281	saville ave	norway maple	good	mulch/ dry/ room to grow	dead, low, & overhanging branches	15"/ 20'	broken branches/ minor exfoliation of bark/ minor graffit scratches	few dead branches/ minor foliar insect damage	some browning & yellowing of margins/ some brown spots on foliage/ slightly wilting
282	saville ave	norway maple	good	mulch/ dry/ room to grow	dead, low, & overhanging branches	15"/ 20'	pruning scars healing/ few broken branches/ minor cracking of bark	dead branches, twigs, & tips/ minor foliar insect damage	fairly significant browning of margins/ some wilt
283	saville ave	norway maple	great	mulch/ dry/ room to grow	dead, low, & overhanging branches	20"/ 25'	broken branches/ some cracking of bark	few dead branches/ minor foliar insect damage/ some type of foliar fungus	brown spots on leaves & samaras/ a few dead leaves
284	saville ave	norway maple	great	mulch/ dry/ room to grow	dead, low, & overhanging branches	20"/ 25'	pruning scars healing/ broken branches/ minor cracking of bark	dead branches, twigs, & tips/ minor foliar insect damage/ some type of foliar fungus	brown spots on leaves & samaras/ browning of leaf margins/ few dead leaves
285	saville ave	norway maple	good	mulch/ dry/ room to grow	dead, low, & overhanging branches	15"/ 20'	pruning scars healing/ broken branches/ minor cracking of bark	dead branches, twigs, & tips/ minor foliar insect damage/ some type of foliar fungus	brown spots on leaves & samaras/ browning of leaf margins/ few dead leaves
286	saville ave	norway maple	great	mulch/ dry/ room to grow	dead, low, & overhanging branches	12"/ 20'	broken branches/ pruning scars healing/ minor cracking of bark/ small gash in base of trunk exposing wood	dead branches, twigs, & tips/ very minor insect damage/ foliar fungus	minor brown spotting & leaf margins/ few dead leaves
287	saville ave	norway maple	great	mulch/ dry/ room to grow	dead, low, & overhanging branches	12"/ 20'	broken branches/ pruning scars healing/ minor cracking of bark	dead branches, twigs, & tips/ very minor insect damage/ foliar fungus	
288	saville ave	norway maple	great	mulch/ dry/ room to grow	dead, low, & overhanging branches	15"/ 25'	broken branches/ pruning scars healing/ minor cracking of bark	dead branches, twigs, & tips/ very minor insect damage/ foliar fungus	
289	saville ave	callery pear	poor-good	slightly sunken grate/ suckers/ room to grow	dead branches	2"/ 10'	small shallow gash on trunk with minor exfoliation of bark/ pruning scars healing	few dead twigs & tips/ some foliar insect damage	fairly significant loss of foliage
290	saville ave	callery pear	good	slightly lifted grate/ weedy/ room to grow	dead tips	2"/ 10'	slightly misshapen the base of trunk/ minor small branch pruning scars healing	few dead tips/ some foliar insect damage	none
291	granite st	callery pear	great	grate slightly lifted/ minor suckers/ room to grow	low, dead, & overhanging branches/ suckers	10"/ 20'	pruning scars healing/ few broken branches	some knots exposing wood/ dead twigs & tips/ foliar insect damage	some wilt/ browning of leaves/ leaf loss
292	granite st	callery pear	great	grate very lifted/ weedy/ room to grow	dead branches	7"/ 15'	misshapen base of trunk/ tree growing on an angle/ deep knot in trunk/ broken branches/ branches dying on one side/ puning scars healing	few dead branches/ foliar insect damage	some wilting & brown leaves
293	granite st	callery pear	extremely poor	flat grate/ dry soil/ room to grow	dead branches * tree is dying & should be removed *	3"/ 10'	broken branches/ pruning scars healing	significant dead branches/ foliar insect damage	significant leaf loss, brown, & yellow leaves
294	granite st	callery pear	poor - good	flat grate/ extremely weedy/ room to grow	dead, low, & overhanging branches	8"/ 15'	knots & gashes in trunk exposing wood/ broken branches/ tree is dying on one side/ pruning scars healing	dead twigs & tips/ foliar insect damage	leaf loss @ tips/ some wilting, yellowing, & browning of leaves
295	granite st	callery pear	good	flat grate/ weedy/ room to grow	dead, low, & overhanging branches	9"/ 15'	broken branches/ pruning scars healing	dead branches & twigs/ foliar insect damage	some minor wilt
296	granite st	callery pear	great	slightly lifted grate/ weedy/ room to grow	dead, low & overhanging branches	12"/ 20'	broken branches/ deep knot in trunk exposing wood	dead branches, twigs, & tips/ foliar insect damage	few dead branches of leaves/ some brown spotting
297	granite st	callery pear	good	slightly lifted grate/ weedy/ room to grow	dead, low, & overhanging branches	8"/ 15'	gash in bark/ broken branches/ pruning scars healing	few dead branches & many dead twigs/ foliar insect damage	some wilting & brown spots
298	granite st	callery pear	great	slightly lifted grate/ dry soil/ room to grow	dead, low, & overhanging branches	10"/ 15'	broken branches/ branch scars exposing wood	dead twigs/ foliar insect damage	some wilting
299	granite st	cherry	extremely poor	encroaching grass & ivy growing up trunk/ room to grow	tree is dying & should be removed	7"/ 10'	none	significant dead branches but still bears fruit & flowers	significant leaf loss
300	granite st	cherry	extremely poor	encroaching grass & ivy growing up trunk/ room to grow	tree is dying & should be removed	7"/ 10'	none	significant dead branches but still bears fruit & flowers	significant leaf loss

Map created by the Quincy Planning and  
Community Development Department

City of Quincy, Massachusetts

Mayor Thomas P. Heeb

ID#	Street	Species	Health	Growing Conditions	Recommended Pruning	Caliper/ height	Mechanical Damage	Decay/Disease	Foliar Condition
301	unnamed rd	apple	good	encroaching grass & ivy growing up trunk/ room to grow	low, dead, & overhanging branches/ suckers	multi - stem 3"-10"/ 20'	splitting bark/ broken branches	quite a few dead branches/ foliar insect damage	browning, yellowing, & wilting of leaves
302	unnamed rd	amur maple	poor	encroaching grass & ivy growing up trunk/ room to grow	low, dead, & overhanging branches	multi-stem 1"-10"/ 20'	broken branches/ pruning scars healing	quite a few dead branches, twigs, & tips/ foliar insect damage	significant leaf loss, brown, wilting, & yellow leaves
303	unnamed rd	DEAD TREE	DEAD	DEAD	TREE IS DEAD & SHOULD BE REMOVED	3"/ 6'	DEAD	DEAD	NO FOLIAGE
304	unnamed rd	tree of heaven	good	encroaching grass & ivy/ room to grow	believe tree planting is unintentional & should be removed while still young	1/2"/ 5'	none	foliar insect damage	few dead leaves
305	unnamed rd	american elm	good	encroaching grass/ weedy/ suckers/ room to grow	suckers & weeds	multi-stem 1"-3"/ 10'	few snapped twigs	foliar insect damage	minor browning & a few dead leaves
306	unnamed rd	american elm	good	encroaching grass/ weedy/ suckers/ room to grow	believe tree planting is unintentional & should be removed while still young	1"/ 8'	none	foliar insect damage	few dead leaves
307	unnamed rd	american elm	poor	dry soil/ room to grow	tree is rotting & should be removed	15"/ 25'	broken branches	dead branches/ serious rotting entire length of trunk & branches/ foliar insect damage	brown gall & brown spotting of leaf margins
308	unnamed rd	green ash	great	grate gone/ dry soil little weedy/ room to grow	dead, low, & overhanging branches	10"/ 20'	some rot @ base of trunk & a few other spots/ small gash in trunk with broken bark	few dead twigs/ some foliar insect damage	few brown & yellow leaves
309	unnamed rd	green ash	great	flat grate/ slightly weedy/ room to grow	dead, low, & overhanging branches	10"/ 20'	misshapen @ base of trunk/ gash in lower trunk exposing wood/ few broken branches	few dead twigs/ some foliar insect damage	minor browning of leaf margins
310	unnamed rd	green ash	great	grate gone/ little weedy/ room to grow	dead, low, & overhanging branches	15"/ 25'	minor root exposure/ good size gash @ base of trunk/ minor gash in upper trunk/ pruning scars healing	few dead branches/ some foliar insect damage	some browning & yellowing of leaves
311	unnamed rd	american elm	good	soil a little dry/ suckers/ room to grow	dead, low, & overhanging branches	20"/ 35'	broken branches/ pruning scars healing	dead & dying branches/ foliar insect damage	significant wilting & leaf loss/ yellow & dead leaves
312	unnamed rd	american elm	good	soil a little dry/ suckers/ room to grow	dead, low, & overhanging branches	20"/ 35'	broken branches/ pruning scars healing	dead & dying branches - one very large dead branch/ foliar insect damage	significant wilting & leaf loss/ yellow & dead leaves
313	unnamed rd	eastern white pine	extremely poor	encroaching grass/ little weedy/ room to grow	tree is dead or dying & should be removed * please note: all pines in this grouping (#s 313-319) are competing for sun with large ash trees - believe lack of sun is causing them to die*	20"/ 25'	pruning scars healing	significant dead & dying branches	significant dead & dying needles
314	unnamed rd	green ash	good	encroaching grass/ minor root exposure/ little weedy/ room to grow	dead, low, & overhanging branches	40"/ 50'	broken branches	dead branches & twigs/ some large dead branches on the ground beneath the tree/ lower branches get no sun & are dying/ foliar insect damage	some yellowing of leaves
315	unnamed rd	green ash	good	encroaching grass/ minor root exposure/ little weedy/ room to grow	dead, low, & overhanging branches	40"/ 50'	broken branches	dead branches & twigs/ lower branches dying from lack of sun/ foliar insect damage	some dead leaves
316	unnamed rd	eastern white pine	extremely poor	dry soil/ encroaching grass/ root exposure/ room to grow	tree is dying & should be removed	20"/ 25'	pruning scars healing	significant dead branches	significant dead needles
317	unnamed rd	green ash	good	significant root exposure/ slightly weedy/ room to grow	dead branches	40"/ 50'	pruning scars healing	quite a few dead branches & twigs	few yellow & dead leaves
318	unnamed rd	eastern white pine	extremely poor	very weedy/ trunk is wrapped with poison ivy & other vines	tree is dying & should be removed	20"/ 30'	pruning scars healing	significant dead branches	significant dead needles
319	unnamed rd	eastern white pine	extremely poor	very weedy/ trunk is wrapped with poison ivy & other vines	tree is dying & should be removed	15"/ 30'	pruning scars healing	significant dead branches	significant dead needles
320	parkingway	green ash	poor	significant root exposure/ encroaching grass/ room to grow	dead, low, & overhanging	20"/ 25'	cracks in bark/ broken branches	significant dead/ minor insect damage	significant leaf loss

CITY OF QUINCY, MASSACHUSETTS

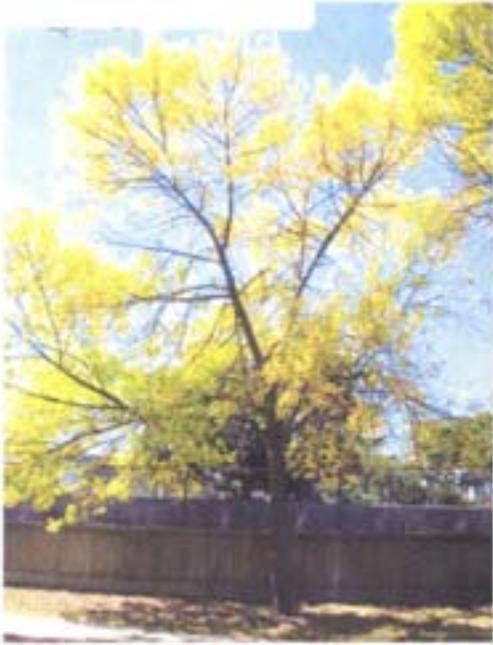

Mayor Thomas P. Koch

ID#	Street	Species	Health	Growing Conditions	Recommended Pruning	Caliper/ height	Mechanical Damage	Decay/Disease	Foliar Condition
321	parkingway	green ash	poor	dry soil/ minor root exposure/ room to grow	dead, low, & overhanging	20"/ 25'	pruning scars healing/ broken branches	significant dead/ minor insect damage	significant leaf loss
322	parkingway	green ash	poor	root exposure/ slightly weedy/ encroaching grass/ room to grow	dead & overhanging	25"/ 25'	some broken branches	significant dead branches/ foliar insect damage	significant leaf loss
323	parkingway	green ash	poor	significant root exposure/ encroaching grass/ room to grow	dead & overhanging	20"/ 25'	pruning scars healing/ some exfoliation of bark/ broken branches	significant dead branches/ foliar insect damage	significant leaf loss
324	parkingway	green ash	poor - good	significant root exposure/ room to grow/ norway maple sucker should be removed	dead & overhanging	25"/ 25'	some cracks in bark/ pruning scars healing/ broken branches	significant dead branches/ foliar insect damage	significant leaf loss but remaining foliage healthy
325	parkingway	green ash	poor - good	encroaching grass/ slightly weedy/ room, but very close to pavement	dead, low, & overhanging branches	30"/ 30'	gash in bark/ broken branches/ pruning scars healing	dead branches, especially on the underside/ foliar insect damage	leaf loss
326	parkingway	eastern white pine	poor - good	encroaching grass/ dry soil/ slightly weedy/ room to grow	dead	30"/ 30'	pruning scars healing	dead branches	fairly significant dry needles/ few brown needles
327	parkingway	eastern white pine	poor	encroaching grass/ dry soil/ weedy/ room, but close to pavement	dead - tree is struggling and should be removed	30"/ 30'	pruning scars healing	more dead branches than living - all lower branches dead	significant loss of needles on lower branches
328	parkingway	green ash	good	root exposure/ very dry soil/ room, but very close to pavement	dead, low, & overhanging	30"/ 30'	large scar near base healing/ deep gash in trunk exposing wood/ some bark exfoliation/ pruning scars healing	lower branches all dead/ broken branches/ minor foliar insect damage	some yellow & brown leaves
329	parkingway	green ash	poor	tree growing at an angle/ root exposure/ very dry soil and very close to pavement	dead, low, & overhanging branches	20"/ 25'	whole trunk rotting and wood exposed/ broken branches	lower branches all dead/ broken branches/ minor foliar insect damage	some yellow and brown spots on leaves
330	parkingway	green ash	good	minor root exposure/ very dry soil/ no room - too close to pavement	dead, low, & overhanging branches	30"/ 30'	some minor exfoliation of bark/ pruning scars healing	lower branches all dead/ broken branches/ minor foliar insect damage	some yellow and brown spots on leaves
331	parkingway	green ash	good	very dry soil/ slightly weedy/ no room to grow	dead, low, & overhanging branches	20"/ 30'	some exfoliation of bark/ broken branches/ pruning scars healing	fairly significant dead branches/ minor foliar insect damage	some yellow and brown spots/ brown and dying leaves
332	parkingway	green ash	good	minor root exposure/ very dry soil/ some room to grow	dead	40"/ 40'	large knot at base of trunk healing/ few minor gashes in bark/ pruning scars healing	some dead branches/ minor foliar insect damage	some yellow and brown leaves and brown spots
333	parkingway	green ash	good	root exposure/ very dry soil/ some room to grow	dead & low branches	50"/ 40'	pruning scars healing	few broken branches/ some dead branches/ minor foliar insect damage	some yellow and brown leaves and brown spots
334	parkingway	green ash	good	some root exposure/ very dry soil/ no room to grow	dead, low, & overhanging branches	40"/ 40'	broken branches/ pruning scars healing	dead branches/ minor foliar insect damage	some yellow leaves and brown spots on leaves
335	parkingway	green ash	poor - good	extremely dry soil/ no room to grow	dead, low, & overhanging	15"/ 30'	exfoliation of bark/ pruning scars healing	fairly significant dead branches/ minor foliar insect damage	some yellow leaves and brown spots on leaves
336	parkingway	green ash	good	little weedy/ extremely dry soil/ no room to grow	dead, low, & overhanging	20"/ 30'	large gash in trunk exposing wood/ pruning scars healing	dead branches/ minor foliar insect damage	some yellow and brown leaves and brown spots
337	parkingway	green ash	poor	very dry soil/ no room to grow	dead, low, & overhanging	15"/ 25'	metal screws embedded in trunk/ pruning scars healing	significant dead branches	significant leaf loss/ some yellow leaves and brown spots
338	parkingway	green ash	good	minor root exposure/ very dry soil/ no room to grow	dead, low, & overhanging	40"/ 40'	few gashes in trunk healing/ pruning scars healing	lower branches dead/ some broken branches/ minor foliar insect damage	some yellow and brown leaves and brown spots
339	parkingway	green ash	poor - good	very dry soil/ no room to grow	dead, low, & overhanging	20"/ 25'	large knot & gash at base of trunk exposing wood/ metal screws embedded/ few minor cracks and pruning scars healing/ broken branches	fairly significant dead branches/ minor foliar insect damage	some yellow leaves and brown spots on leaves
340	parkingway	green ash	poor - good	slightly weedy/ very dry soil/ no room to grow	dead, low, & overhanging branches	20"/ 25'	few low gashes exposing wood/ some exfoliation of bark/ broken branches/ pruning scars healing	fairly significant dead branches/ minor foliar insect damage	some brown leaf margins and spots/ few brown and yellow leaves

ID#	Street	Species	Health	Growing Conditions	Recommended Pruning	Caliper/ height	Mechanical Damage	Decay/Disease	Foliar Condition
361	unnamed rd	honey locust	poor - good	encroaching grass/ room to grow	dead	20"/ 25'	few broken branches/ pruning scars healing	significant dead branches	fairly significant leaf loss
362	unnamed rd	honey locust	good	encroaching grass/ room to grow	dead	20"/ 25'	crack runs length of trunk & various other cracks in bark	several dead branches	fairly significant leaf loss
363	unnamed rd	honey locust	poor - good	encroaching grass/ room to grow	dead	20"/ 25'	broken branches	significant dead branches	significant leaf loss
364	unnamed rd	honey locust	great	encroaching grass/ root exposure/ room to grow	dead and low	15"/ 20'	some cracking and exfoliation of bark exposing wood/ few broken branches/ pruning scars healing	some dead branches	few yellow leaves
365	unnamed rd	honey locust	good	encroaching grass/ room to grow	dead, low, & overhanging	15"/ 20'	few fairly large knots exposing wood/ pruning scars healing	quite a few dead branches	few yellow leaves
366	cliveden place	callery pear	great	dry/ little weedy/ room to grow	dead, low, & overhanging	15"/ 20'	pruning scars healing/ broken branches/ few knots exposing wood	some dead twigs/ minor foliar insect damage	few dead, yellow, & brown leaves
367	cliveden place	callery pear	good	weedy/ dry/ room to grow	dead & overhanging	8"/ 12'	deep knot/ broken branches/ pruning scars healing	some dead twigs	several dead, brown, & yellow leaves
368	cliveden place	callery pear	good	weedy/ dry/ room to grow	dead, low, & overhanging	8"/ 12'	large gash & knots in trunk exposing wood/ broken branches/ pruning scars healing	several dead branches/ very minor foliar insect damage	several dead, brown, & yellow leaves
369	unnamed rd	american elm	good	very dry/ no room to grow	suckers	100"/ 40'	large broken branch & several smaller ones/ pruning scars healing	some dead branches	few yellow & brown leaves
370	unnamed rd	american elm	poor - good	very dry/ root exposure/ no room to grow	dead	30"/ 40'	large deep knot in trunk exposing wood/ broken branches/ pruning scars healing	few dead branches	some yellow & brown leaves
371	unnamed rd	american elm	poor - good	very dry/ no room to grow	dead	50"/ 45'	few broken branches/ pruning scars healing	few dead branches, twigs, & tips	some yellow & brown leaves
372	unnamed rd	american elm	good	slight root exposure/ no room to grow	dead	80"/ 45"	knots in trunk exposing wood/ pruning scars healing/ few broken branches	few dead branches, twigs, & tips	some yellow & brown leaves
373	unnamed rd	american elm	great	some root exposure/ no room to grow	dead & overhanging	80"/ 45'	some exfoliation of bark/ broken branches/ knots/ pruning scars healing	few dead branches	few yellow & brown leaves
374	unnamed rd	american elm	great	some root exposure/ no room to grow	crowded, dead, & overhanging branches	70"/ 45'	minor gash in trunk/ knots & pruning scars healing	few dead branches	few yellow & brown leaves
375	unnamed rd	american elm	great	mulch/ no room to grow	dead, low, & overhanging	30"/ 45'	several cracks in bark/ knots & pruning scars healing	few dead branches, twigs, & tips/ minor foliar insect damage	few yellow & brown leaves
376	unnamed rd	american elm	good	mulch/ slightly weedy/ room to grow	dead, low, & overhanging	30"/ 45'	few cracks in bark/ knots in trunk with minor wood exposure/ broken branches/ pruning scars healing	few cracks in bark/ knots in trunk with minor wood exposure/ broken branches/ pruning scars healing	few yellow & brown leaves
377	unnamed rd	american elm	great	dry soil/ slightly weedy/ no room to grow	dead, low, & overhanging	12"/ 20'	few cracks in bark/ knots in trunk with minor wood exposure/ broken branches/ pruning scars healing	few cracks in bark/ knots in trunk with minor wood exposure/ broken branches/ pruning scars healing	few yellow & brown leaves
378	parkingway	littleleaf linden	great	mounded mulch/ dry/ room to grow	none	3"/ 10'	few cracks in bark/ broken branches exposing wood/ pruning scars healing	few dead twigs/ foliar insect damage	some yellowing & browning of leaves
379	parkingway	littleleaf linden	great	mounded mulch/ dry/ room to grow	none	3"/ 10'	few cracks in bark/ pruning scars healing	foliar insect damage	brown spots/ few yellow & brown leaves
380	parkingway	littleleaf linden	great	mounded mulch/ dry/ room to grow/ few suckers	few dead twigs	3"/ 10'	few cracks in bark/ pruning scars healing	foliar insect damage	brown spots/ few yellow & brown leaves

468	hancock st.	callery pear	great	flat grate/ some room to grow	dead & overhanging	10"/ 12'	deep cavity near base/ gash & knots exposing wood/ broken branches	some knots & rot in small branches/ few dead twigs/ minor foliar insect damage	slightly wilt/ few dead leaves
469	hancock st.	callery pear	poor - good	flat, broken grate/ slightly weedy/ room to grow	dead, low, & overhanging	3"/ 10'	missshapen base/ broken branches	several dead twigs/ foliar insect damage	slightly wilt/ few brown margins
470	hancock st.	callery pear	good	flat grate/ room to grow	overhanging	3"/ 10'	some cracking & exfoliaton of bark/ broken branches	several dead twigs/ foliar insect damage	few dead leaves/ brown spots
471	hancock st.	callery pear	good	flat grate/ room to grow	dead & overhanging	4"/ 12'	several knots exposing wood/ broken branches	dead twigs/ minor foliar insect damage	brown spots
472	hancock st.	callery pear	good	flat grate/ slightly weedy/ room to grow	overhanging	4"/ 12'	significant knots exposing wood	foliar insect damage	few dead leaves/ brown spots & margins
473	hancock st.	callery pear	good	flat grate/ slightly weedy/ room to grow	dead & overhanging	4"/ 12'	several small knots exposing wood/ several broken branches	foliar insect damage	brown spots & margins
474	hancock st.	callery pear	great	flat grate/ suckers/ room to grow	suckers, low & overhanging	7"/ 15'	few small gashes in trunk/ knots healing/ broken branches	few dead twigs/ foliar insect damage	brown spots & margins
475	hancock st.	callery pear	poor - good	flat grate/ room to grow	dead, low, & overhanging	4"/ 15'	several broken branches/ small knots exposing wood	several broken twigs/ few small scars in branches/ foliar insect damage	wilty/ few dead leaves/ brown spots & margins
476	hancock st.	callery pear	great	flat grate/ room to grow	dead, low, & overhanging	8"/ 20'	missshapen base	foliar insect damage	some wilt/ brown spots & margins
477	hancock st.	callery pear	great	lifted grate/ suckers/ room to grow	suckers, low & overhanging	15"/ 20'	deep knot near base exposing wood/ pruning scars healing	few dead twigs/ minor foliar insect damage	minor brown spotting & leaf margins
478	hancock st.	callery pear	good	flat, broken grate/ room to grow	dead, low, & overhanging	7"/ 15'	gash in trunk/ broken branches	dead twigs/ foliar insect damage	minor brown spotting & leaf margins
479	hancock st.	callery pear	good	flat grate/ slightly weedy/ room to grow	dead, low, & overhanging	10"/ 20'	several knots exposing wood/ broken branches/ insulation foam splattered on trunk - don't know if any chemical damage yet	several dead twigs/ some foliar insect damage	brown spots & margins
480	hancock st.	callery pear	good	slightly lifted, broken grate/ room to grow	dead & low branches	7"/ 15'	several knots exposing wood/ broken branches	several dead twigs/ some foliar insect damage	brown spots & margins
481	hancock st.	callery pear	good	slightly lifted grate/ room to grow	dead & overhanging	12"/ 15'	large broken branch/ small knot exposing wood	several dead twigs/ some foliar insect damage	brown spots & margins
