FY2019 Interim Project completion 10/07/18

FY2020 Interim Project completion 10/30/19

**Public Relations:**

- The Assessors and the Contractor will cooperate in maintaining good public relations throughout the period of this project. The Contractor will coordinate all activities necessary to promote public understanding, awareness and cooperation in conjunction with the entire project.

- Local Staff Training.
• Training for the Assessors and staff will consist of on-the-job training.

• On-the-job training will include, but not be limited to, the Assessors and office staff working in the appropriate phases of this project under the Contractor's supervision.

**Data Collection:**

• There are no data collection services as part of this project scope of services.

• The Contractor will identify each parcel in accordance with the applicable Department of Revenue's "Guidelines for Classification of Property According to Use, Property Type Classification Codes".

**Sales Verification:**

• The Contractor will verify, in accordance with this Statement of Services, the property inventory data for those properties located throughout the MUNICIPALITY which have sold in the complete calendar year prior to the valuation date for this program.

  The purpose of this verification is to enable the Contractor to produce a machine readable file for valid arms-length sales, describing inventory status as of the date of sale. The Contractor will verify this data for all sales occurring until the valuation date of this program. The Contractor will develop and provide the Assessors with appropriate written documentation for the sales verification effort.

• **Valuation Testing:** Manual or computer assisted valuation testing for all types of property will take place subsequent to sales verification. All valuation testing must be reviewed and approved by the Assessors before commencement of the valuation production.

**Valuation:**

• The Contractor will compute, to the nearest One Hundred Dollars ($100.00), the value of all properties within the scope of this Statement of Services. A minimum of two (2) approaches to value from the following three (3): market, cost or income, will be employed for all income-producing properties. The preferred valuation method for the types of properties listed below is the income approach to valuation as the main approach.

  Income-producing properties include, but are not necessarily limited to, the following types: primarily commercial/industrial/multiple-use properties; apartments over four units; hotels and motels; storage, warehouse and distribution facilities; discount and department stores; shopping centers and malls; supermarkets; small retail properties; office buildings; medical office buildings, research and development facilities; and properties within industrial parks.

• The minimum requirements for each of the three (3) major approaches to value, as well as land valuation, are outlined in the following sections. The Contractor will describe the approach to value which will be applied to each type of property within the scope of this Statement of Services.
**Market Value Approach:**

- The Contractor will employ a market adjusted cost approach. It is a system that is very easy to explain to the taxpayer, as well as a system which is very familiar to the Massachusetts Department of Revenue Certification Team. This approach is used on residential properties with its starting point based upon replacement cost approach values. It is then fine-tuned by adjusting these replacement cost values based upon market sales activity, segmented and segregated by the most pertinent property characteristics.

Land valuation will be accomplished through a sales ratio analysis of vacant sales, as well as an overall property ratio analysis, deducting improvement values and extracting land values from the improved sales. Each neighborhood, street by street, will be rated for desirability using a site index, which provides a factor that may be applied to a base square foot schedule to account for differences in location. In addition, condition factors will be applied to account for negative or positive influences on value such as topography, view, irregular lot shape and other factors.

Overall property values, including improvement value, will be verified by the sales ratio analysis, segregated by the pertinent value related factors of each property. This analysis will be done within various categories, including style of home, segmented by size and age group in ten (10) year increments, by lot size and location factors. This analysis enables the Appraisers to fine-tune the replacement cost approach for each property to create a mirror image of market sales activity within the MUNICIPALITY.

Regarding commercial/industrial properties, the market value approach will be employed on properties not utilizing a combination of the replacement cost approach and the income approach. For commercial/industrial properties that are basically non-income-producing, the secondary approach will be the market approach, utilizing the square foot values derived from the sales analysis for the particular use type of the property. Square foot values will be segregated by type, including industrial, warehouse, retail, etc. and will provide reasonable ranges for per square foot sale prices of building areas. Land value, once determined, will be added to building value for an estimate of total value.

**Replacement Cost Approach:**

- The replacement cost approach to value will be employed for both residential and commercial/industrial properties as follows:
  
  o Information derived from cost analysis will provide the basis for determining the unit-in-place and replacement cost pricing schedules used in the valuation of residential and commercial/industrial properties.
  
  o Subsequent to the determination of replacement cost pricing schedules and the establishment of land values, the Contractor will analyze the sales of improved properties in order to derive an estimate of physical and functional depreciation and economic obsolescence. A report of this study of sales of improved properties
will be made to the Assessors, listing the comparison subjects and detailing the schedules of adjustments to be made prior to valuation production.

- Physical and functional depreciation and economic obsolescence will be computed to be the difference between the selling price of the total property and the sum of the estimated replacement cost new of the improvement plus the estimated land value.

- Provided that a sufficient number of sales are available, guidelines in the form of tables based upon the condition, desirability and usefulness of a building relative to its actual age will be developed. After approval by the Assessors, these tables will be used to estimate the depreciation of comparable subject properties.

**Income Approach:**

- The Contractor will review and screen income and expense reports furnished by the parcel owner, or prepared as a result of interviews with the property owner; will determine the validity of the data and will make any necessary adjustments on the basis of the Contractor's appraisal knowledge of income and expense data of comparable properties. The MUNICIPALITY shall be responsible for the postage and the mailing of income and expense forms. A report containing documentation and derivation of rent schedules, expense ratios and capitalization rates shall be submitted to the Assessors for review prior to the commencement of the valuation field review. Contractor shall enter in all income and expense forms returned to the city into the Vision Database.

- A value determined by the income approach to valuation will be made for each income-producing property. The income and expense statements will become the property of the MUNICIPALITY.

**Land Valuation:**

- Basic square foot values for all parcels shall be established for land throughout the MUNICIPALITY after an evaluation by the Contractor of all factors affecting the market value of lots and parcels. Factors to be considered shall include the quality of the neighborhoods, zoning restrictions, size, frontage, depth, shape and topography of the parcels, and all other factors considered relevant in the establishment of land values for each of the various classes of property.

- These land unit values will be determined as a result of an analysis of recent sales of comparable properties, either within the MUNICIPALITY or within an agreed upon area of the state, or by using a land residual approach. Any land classified by the Assessors under Massachusetts General Laws Chapter 61A as in agricultural or horticultural use will be valued after consideration of the current guidelines issued by the Farmland Valuation Advisory Commission.

**Preliminary Certification Review:**
The Commissioner of Revenue must conduct a certification review to determine whether the new values resulting from this project represent full and fair cash value. As a condition of successful project completion, Contractor's work product will meet all certification requirements of the Commissioner.

**Valuation Field Review:**

- The Contractor will be responsible for field review of value estimates and parcel data accuracy of fifty percent of the Real property parcels in the community. The personnel conducting this phase of the program will have three (3) years mass appraisal and field review experience and knowledge of the valuation techniques employed in the MUNICIPALITY, as well as complete familiarity with the valuation project.

- It is understood that the Contractor will have the ability to exercise judgment in making final value estimates. The Contractor, in order to ensure valuation accuracy and consistency, will be required to document such judgment. Documentation for changing any computer generated value estimates will also be required. All such documentation shall be the property of the Assessors.

- If valuation changes are made due to data error, the data will be corrected on the computer and/or manual file by the Contractor.

- All values produced by the Contractor will be given to the Assessors for final review and for a determination as to whether the Contractor's work product is satisfactory for the purposes of requesting a certification review by the Commissioner of Revenue. The Contractor will provide the Assessors with all valuation models and schedules, property record cards, sales analyses and field documents necessary to conduct this review. These documents will become the property of the MUNICIPALITY.

**Certification of Values:**

- As a condition of successful project completion, the Contractor's work product will meet all certification requirements of the Commissioner.

- **Defense Of Values:** The Contractor will provide at the City's discretion expert witnesses to represent the MUNICIPALITY at all appeals to any court, the appellate tax board or otherwise, of valuations and/or classifications resulting from this project. The expert witnesses will have performed a visual review of the property. The Contractor will furnish these services, including comprehensive written appraisal reports if required, for a per diem rate agreed upon by the City of Quincy prior to any such representation.

  - **Inspection, Monitoring and Evaluation:** To ensure compliance with this agreement, the Assessors shall have the right to enter the Contractor's premises during normal business hours to inspect, monitor or otherwise evaluate the work performed or being performed therein.

Ownership and Confidentiality of Information:

- All information acquired by the Contractor from the MUNICIPALITY, or from others at the expense of the MUNICIPALITY, in the performance of this agreement shall be and remain the property of the MUNICIPALITY. This includes all records, data files, computer records, work sheets, deliverable products (complete and incomplete) and all other types of information prepared or acquired by the Contractor in the performance of this agreement.
• The Contractor recognizes that, in the performance of this agreement, it may obtain or have access to confidential information, including information subject to restrictions on its disclosure pursuant to Massachusetts General Laws Chapter 59, Section 52B, and agrees to comply with all laws and any regulations, rules and guidelines promulgated thereunder regarding access to, and disclosure of such information. The Contractor further agrees that it will inform each of its employees having any involvement with confidential information of the laws, regulations, rules and guidelines relating to confidentiality and will, at the request of the Assessor, have each employee with access to such information sign a statement that they are aware of and will abide by all such laws, regulations, rules and guidelines.

• The Contractor agrees that it will use this information only as required in this performance of this agreement and will not, before or after the completion of this agreement, otherwise use said information, nor copy nor reproduce the same in any form, except pursuant to the sole written instructions of the Assessors. The Contractor further agrees to return said information to the MUNICIPALITY promptly at its request in whatever form it is maintained by the Contractor.

• The Contractor agrees to take reasonable steps to ensure the confidentiality and security of this information in its possession or under its control.

• In the event of the Contractor's failure to conform to the requirements set forth above, the MUNICIPALITY may terminate this agreement upon thirty (30) days written notice, unless within such thirty day (30) period, the failure to conform is cured.

**Indemnification:**

• The Contractor agrees to indemnify and hold harmless the MUNICIPALITY against claims for bodily injury, death and property damage which arises in the course of the Contractor's performance of this project with respect to which the MUNICIPALITY is free from negligence on the part of itself, its employees and agents.

**Insurance Requirements:**

• The Contractor will, at its own expense, maintain and keep in force all insurance required by law for its employees; including Disability, Workman's Compensation, Unemployment and Public Liability Insurance, at least as hereinafter set forth so as to protect it and the MUNICIPALITY from claims for personal injury and property damage for the entire pendency of the project.

• All the insurance will be issued by an insurer licensed and authorized to do business in Massachusetts. The Contractor shall maintain insurance satisfactory to the MUNICIPALITY covering any and all property damage or bodily harm which may be suffered by reason of negligence of the Contractor, its employees or agents during the execution of the project. The said certificate of insurance shall be submitted to the Assessor within thirty (30) days of the signing of the agreement.
Termination:

- Subject to the provisions of the section entitled "Force Majeure", if either party fails to fulfill, in a timely and satisfactory manner, their obligations under this agreement, or shall violate any of the covenants, conditions or stipulations of this agreement, which failure or violation shall continue for twenty one (21) days after written notice of said failure or violation is received by the offending party, then the opposing party shall thereupon have the right to terminate this agreement by giving written notice to the offending party of such termination and specify the effective date thereof, at least seven (7) days before the effective date of such termination.

- In the event of termination, all finished work and documentation, complete and incomplete, shall, at the option of the Assessor, be delivered to them. The Contractor shall be entitled to receive just and equitable compensation for any work performed under this agreement completed prior to the date of termination which is determined by the Assessors to be satisfactory.

- Notwithstanding the above, in the event of termination, neither party shall be relieved of liability by virtue of its breach of this agreement.

Force Majeure:

- Neither party will be liable to the other or be deemed to be in breach under this agreement for any failure to perform, including, without limitation, a delay in rendering performance due to causes beyond its reasonable control such as an order, injunction, judgment or determination of any Court of the United States or of the Commonwealth of Massachusetts, an Act of God, war, civil disobedience, extraordinary weather conditions, labor disputes or shortages or fluctuation in electric power, heat, light or air conditioning. Dates or time of performance will be extended automatically to the extent of such delays, provided that the party whose performance is affected promptly notifies the other of the existence and nature of such delay.

It is agreed, however, that, since the performance dates of this agreement are important, continued failure to perform for periods aggregating sixty (60) days or more, even for causes beyond the control of the Contractor, shall be deemed to render performance impossible and the Assessor shall thereafter have the right to terminate this agreement in accordance with the provisions of the section entitled "Termination of Agreement".

Conflict of Interest:

- The Contractor agrees that to the extent that such law is applicable to the duties it is to perform hereunder, it will comply with the provisions of Chapter 268A of the General Laws concerning conflict of interest. The Contractor covenants that it presently has no interest and shall not acquire any interest, direct or indirect, which would conflict in any manner or degree with the performance of service required to be performed under this agreement.

- The Contractor shall not employ as a director, officer, employee, agent, Contractor or subcontractor, directly or indirectly, any elected or appointed official of the MUNICIPALITY or any member of the immediate family of such official for the duration of the project.
Effectiveness of Agreement:

- The effective date of this agreement shall be the date upon which the agreement is signed and executed by the Contractor and the MUNICIPALITY and is approved by the Commissioner of Revenue as to form and content in accordance with Massachusetts General Laws, Chapter 58, Section 1A and 830 Code of Massachusetts Regulations 58.1A.1(5).
