ADDENDUM NUMBER 2
RE: REQUEST FOR QUOTES DUE: February 5, 2020 @ 4:00 P.M.

REQUEST FOR QUOTES: “Removal & Disposal of Closed Underground Storage Tank” At Broad Meadows Middle School

PLEASE NOTE: This Second Addendum is being issued following the non-mandatory site visit on January 31, 2020 at which time further questions were asked by potential proposers relative to the above referenced Request for Quotes and because further information has been developed by the City of Quincy.

ANSWERS TO QUESTIONS ASKED IN RESPONSE TO THIS SOLICITATION:

*The records complied by the City indicate that the tank to be removed is a single wall steel tank with a capacity of 10,000 gallons. The top if the tank has been determined to be less than 30 inches below surface grade of the land above the tank.

*There is no concrete pad on top of the tank. There is a concrete bad below the tank and the City desires to have this lower pad remain in place.

*Slurry material removed from the tank is to be properly disposed of off-site. When removed from the tank, if the slurry material is to be held for any period of time on-site then it must be placed inside of one or more lined dumpsters.

FURTHER CONTRACT REQUIREMENTS based on added information developed by the city:

It has been determined that there is up to 200 gallons of oil and water mix in the tank on top of the slurry fill. The Contractor shall extract this mix via pumping it into barrels and the water oil mix shall be transported off-site and properly disposed of by the Contractor.

It has been determined that the in-place slurry has solidified. It is anticipated, but has not been confirmed by the City, that this slurry would have hardened into a weak sandy concrete. Contractor shall anticipate this and provide for its appropriate removal and its appropriate disposal off-site.

Because the fuel lines from the building to the underground storage tank run beneath the later installed gas service, the Contractor shall cut all of these lines underground at a point no more than 10 feet off of the face of the building and shall permanently cap the lines that will remain in
the ground. The portion of these lines on the underground storage tank side of these cuts shall be removed by the Contractor and properly disposed of.

The Contractor shall provide with its response to this Solicitation for Quotes unit pricing on the bid form that will have a price per ton to properly excavate, transport and legally dispose of any contaminated slurry.

The Contractor shall provide with its response to this Solicitation for Quotes unit pricing on the bid form that will have a price per ton to properly excavate, transport and legally dispose of any contaminated soils found around the underground tank and its vicinity.

The City desires to have the concrete pad beneath the underground tank remain in place. However, if it is determined that that pad is contaminated, then the Contractor shall provide with its response to this Solicitation for Quotes unit pricing on the bid form that will have a price per ton to properly excavate, transport and legally dispose of this concrete pad.

The City shall apply for a MassDEP Waste Generator permit and number.

It is the Contractor's responsibility to arrange for a properly secured soil samples and have a certified EPH analysis done and submitted to the City.

Because it is the City's intention and the Contractor's responsibility to back-fill the tank excavation with crushed stone, Contractor shall properly excavate, transport and legally dispose of any clean soils excavated in the removal of the underground tank and in its vicinity.

The building water supply line is in very close proximity to the excavation location. Contractor must at all times protect the water service from damage.

The building gas service is in very close proximity to the excavation location both below grade and above. The above grade gas piping and meters are on pad mounted stands and are not secured to the building. Contractor must at all times protect the gas service from damage.

There are year-old "Dig Safe" markings on the ground, however the authority under this Dig Safe case has expired. Contractor must timely secure Dig Safe services prior to excavation.

There is a six foot tall chain link enclosure around the trash dumpsters immediately next to the underground tank. Contractor shall remove and properly dispose of this entire fence enclosure.

Contractor shall provide perimeter construction fencing and siltation control measures.

Contractor will be allowed to work Monday through Friday from 7am until 8pm and Saturday 8 am until 8pm.

Only unless delayed because of and in the event of soil contamination, all work must be completed between 3pm February 14, 2020 and completed on or before 8pm Saturday February 22, 2020.
Clarification of “RULE OF AWARD”

2) A successful respondent must have demonstrated experience performing similar services for municipalities, school districts or private firms over the past five years.

3) b. Three (3) municipal, school district or private firm references indicating the respondent’s services, quality of work, response times, personnel qualifications, business and billing office competence abilities.

The “DEADLINE” for response to this QUOTE solicitation is 4pm on February 5, 2020

Thank you. PLEASE ACKNOWLEDGE BOTH THE FIRST AND THIS SECOND ADDENDUM IN YOUR RESPONSE, AS EACH IS NOW A PART OF THE SOLICITATION FOR QUOTES.
Price Solicitation Response Form

This Form was MODIFIED by Addendum 2

A response to this Quote Solicitation must be made utilizing this Form.

Complete all sections. If a section is not relevant or does not apply, indicate "Not Applicable"

This is NOT a formal Invitation to Bid - It is a request or solicitation of a Price Proposal

Sealed Bids are NOT required

Return this form completed by 4pm Thursday, February 5, 2020 via email to phines@quincyma.gov

Contractor's acknowledgement of Addendum #1 _____________

Contractor's acknowledgement of Addendum #2 _____________

A. Contract Agreement

The undersigned proposes to furnish all labor, materials and services as is required for this contract in accordance with the accompanying specifications, requirements, and all provisions, terms and conditions contained in the Price Solicitation as amended by Addendum 2 for the prices specified below:

Name of Business Entity or D/B/A

_______________________________________________________________

Signature: ___________________________________________________________________

Name (Printed): ___________________________________________________________________

Title: _____________________________    Date: _______________________
B. Qualifications

1. Do you have at least five (5) years demonstrated experience performing similar services?
   
   ________ Yes  ________ No

2. Do you possess adequate labor, equipment, engineering, and management capabilities to effectively service this contract over the anticipated term?
   
   ________ Yes  ________ No

3. Does your firm and its employees have all required certifications and licenses to perform under this contract?
